The new R ACE 2025 comes fully loaded with POWER. More dominant in the overhead game thanks to its high balance and its new composition of EVA Mid Hard rubber, one point harder than its predecessor. Designed for professional players looking for a beast in the attacking game to help them dominate and take the initiative of the point. Manufactured from 340 to 365gr, R ACE Light, and from 365 to 380gr the R ACE allows to adapt this power racket to players of all types.

Designed to offer an attacking racket to those players who want to protect their elbow from epicondylitis. Manufactured with a hybrid composition MIX, Polyethylene Rubber and EVA Rubber inside, it offers a tremendously versatile medium touch racket. The 35th Anniversary Hybrid model incorporates all Royal Padel technologies to minimize the vibrations that cause epicondylitis. In addition, a new arrangement of holes has been developed to increase the durability and handling of the racket without losing any of its characteristics.

We maintain the composition of the Whip Series but with a complete redesign. This 2025 Whip Poly and Light models come with a total design change and a new layout of holes to increase durability and manageability. A racket with a great control and a magnificent comfort so that your shots are highly accurate and require less effort. We incorporate the new DMND Spin rough more durable to give the effect you want to your shots.

High

FORMA

Diamond Oversize

This year, we incorporate to our collection a type of racket with innovative features in Royal Padel. We have developed our new Golden White model, an oversize diamond racket with high balance but with a Polyethylene core (Soft). Many players have become accustomed to carrying diamond racquets oriented to improve the aerial game but miss the soft feel of polyethylene. This racket is a combination of the best of both worlds, the comfort and precision of polyethylene and the ease of hitting a high balance diamond racket.

Royal Padel

INTERMEDIATE SERIES: **KEEP IMPROVING**

RP 771 EFE

CORE

Polyethylene

SURFACE

Fibertech & Carbon Frame

BALANCE

High

FORMA

Teardrop Oversize

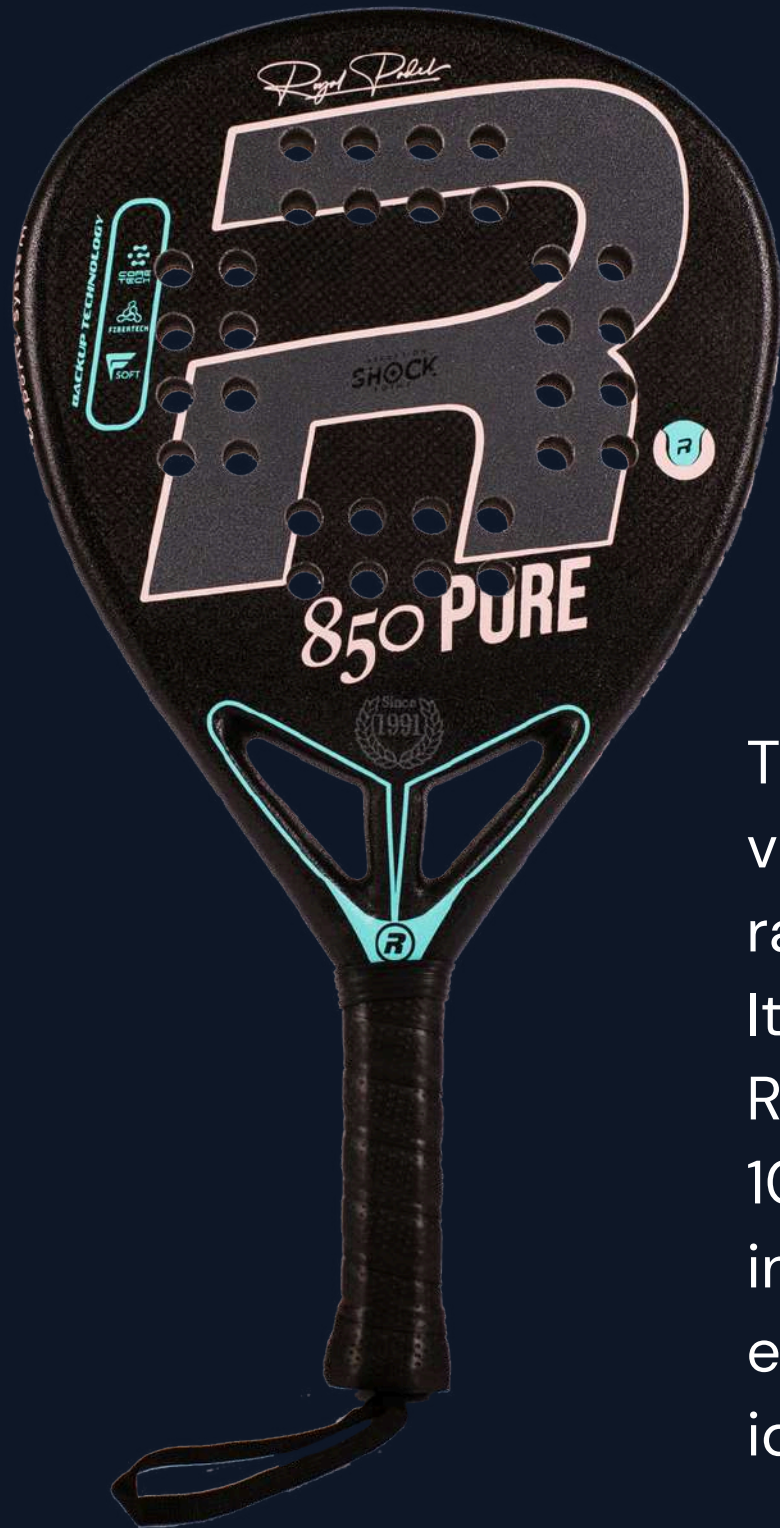

The Efe Extreme model is an intermediate level padel racket, ideal for players looking for versatility and good performance both in attack and defense. Its teardrop shape and medium balance provide control and power. With a large sweet spot, it stands out in control without losing response in smash, x3 and viboras. Made with a medium hard polyethylene core, it combines fiberglass and carbon fiber in key areas for greater durability. Perfect for beginners who want a racket to accompany their progression, ideal to have a good rental racket in a club!

Royal Padel

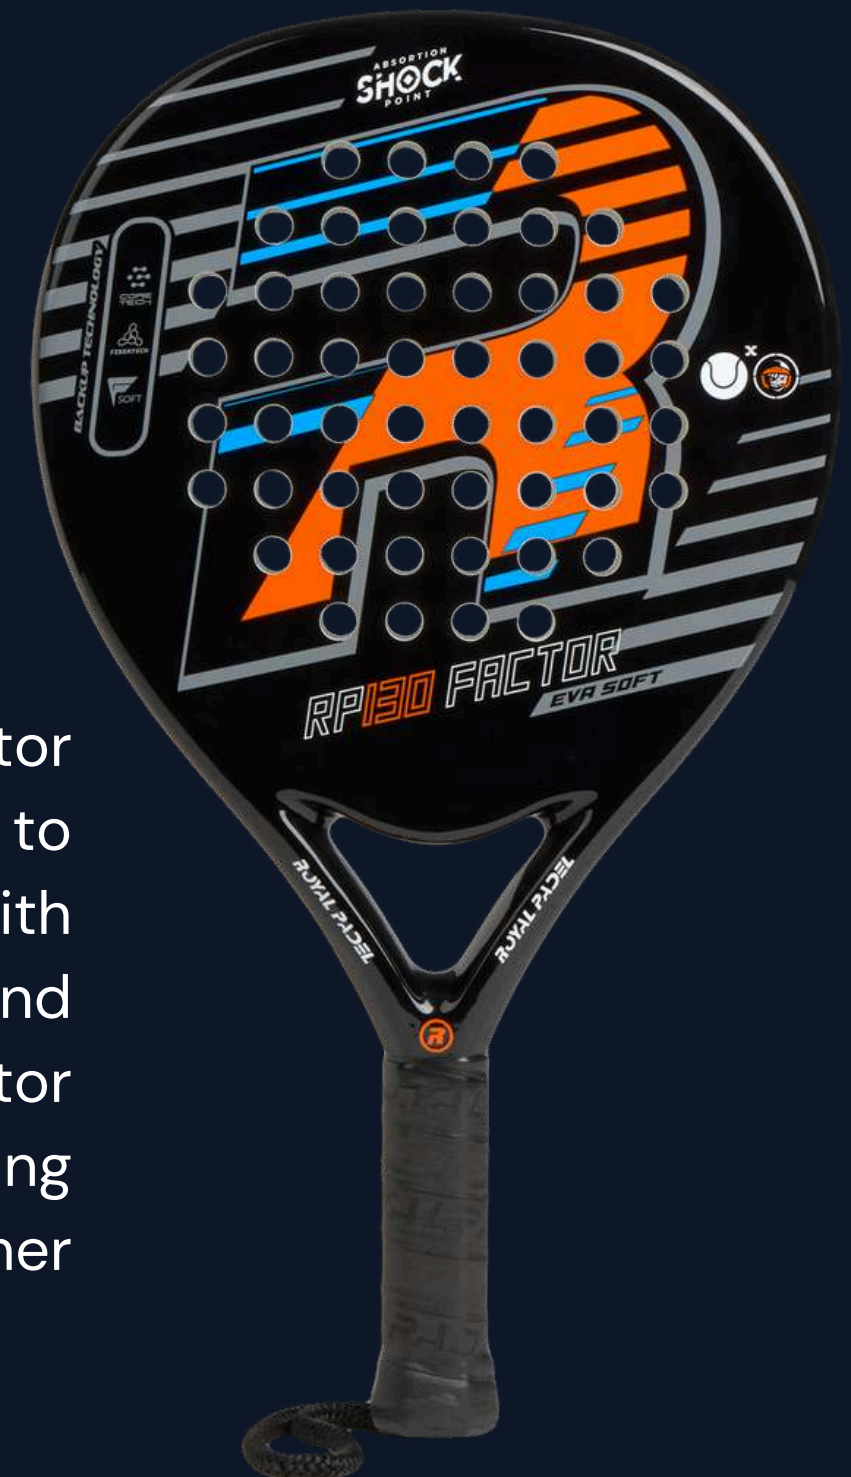

INTERMEDIATE SERIES: **KEEP IMPROVING** RP PURE - RP FACTOR

Mid EVA	CORE	EVA Soft
Fibertech & Carbon Frame	SURFACE	Fibertech
Medium	BALANCE	Low
Diamond Oversize	SHAPE	Teardrop

The Royal Padel Pure model is a very resistant intermediate level racket with high-end performance. It is composed of a core of Eva Rubber and the faces are made of 100% 3K Carbon. Ideal for intermediate players looking for an extra point of power in their racket, ideal as a good rental racket!

The new evolution of the RP Factor comes with a Soft Eva Rubber to combine control and durability. With an extended sweet spot and improved ball output, the new Factor allows players who are just starting to play to pass the ball to the other side of the court much more easy.

AGE

From 3 to 7 years

Introducing the new Kids' Padel Racket, specially designed to protect your child's elbow! Perfect for young players aged 5 to 8, this racket offers a unique blend of lightness and comfort. Weighing only 260 grams and featuring an ergonomic design, it's easy to handle, allowing kids to play without fatigue. Unlike other rackets, our Shock Absorption technology minimizes vibrations, helping prevent elbow issues. With a large sweet spot and comfortable grip, it also provides added safety, helping young players build skills and confidence with every shot.
